B1

This application is a continuation-in-part of application Serial No. 08/795,962, filed February 6, 1997, now abandoned, which is a continuation of application Serial No. 08/586,427, filed January 16, 1996, now abandoned, which is a continuation of application Serial No. 08/215,030, filed March 18, 1994, now abandoned, which is a continuation-in-part of application Serial No. 08/033,385, filed March 18, 1993, now abandoned. --

In the Claims

Please amend the Claims in the following manner:

B2

1. (Amended) A composition comprising [an admixture of colloidal metal] a biologically-active factor admixed with or bound to a colloidal metal [and a] such that the biologically-active factor is released from the composition *in vivo*.
8. (Amended) A composition capable of targeting a particular tissue comprising a biologically-active factor and [a colloidal metal associated with] a target molecule admixed with or bound to a colloidal metal such that the [and a] biologically-active factor is released from the composition *in vivo*.
9. (Amended) A method of administering a biologically-active factor to a human or animal comprising [the step of administering to the human or animal, an effective amount of a composition comprising an admixture of a colloidal metal and biologically-active factor]
 - 1) admixing or binding a biologically-active factor and a colloidal metal to form a composition; and
 - 2) administering the composition to the human or animal such that an effective amount of the biologically-active factor is released from the composition *in vivo*
